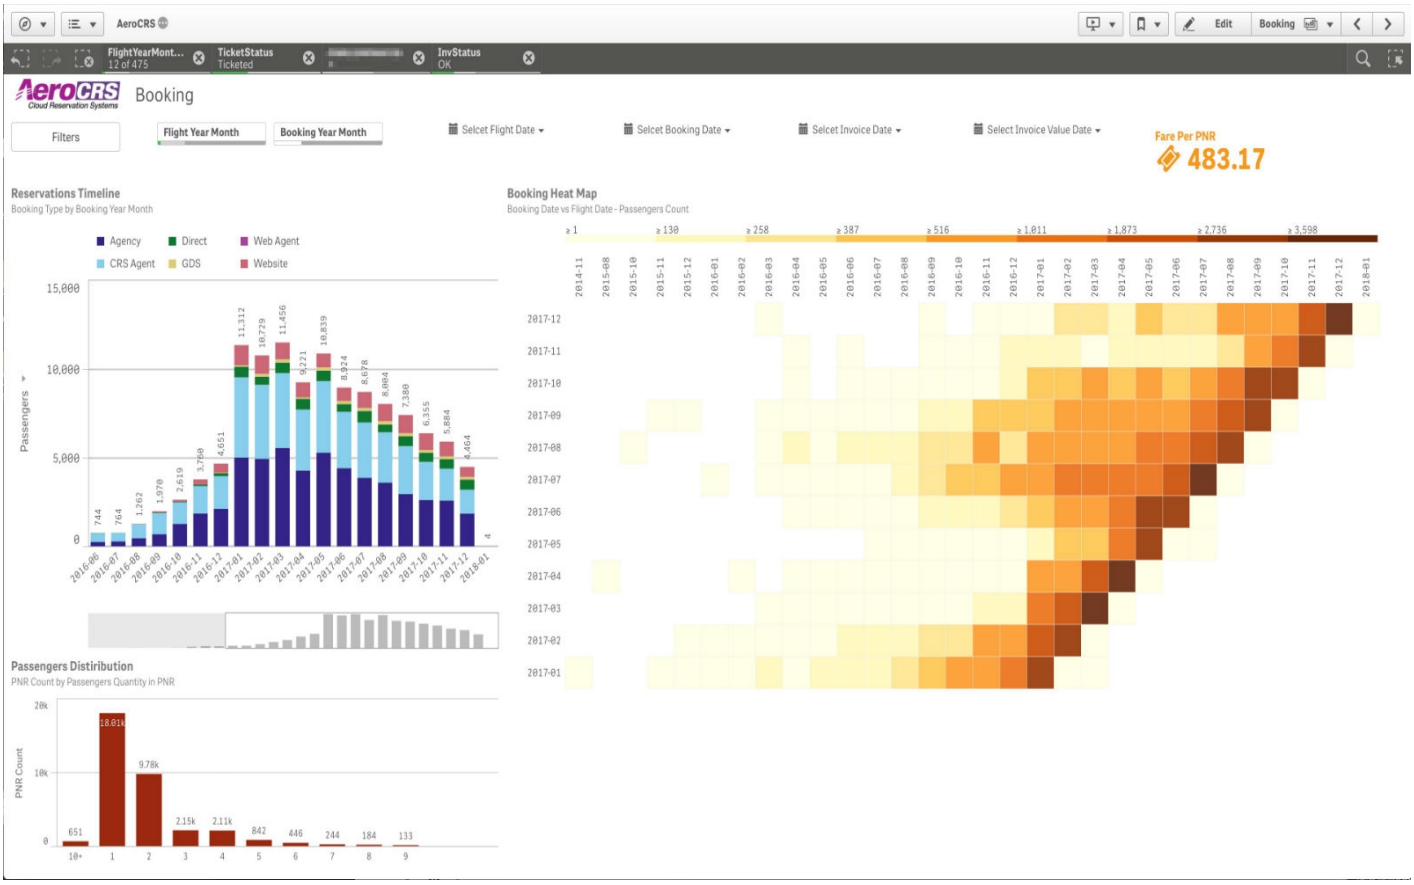
AEROCRS LAUNCHED QLIK SENSE SYSTEM

News / Airlines



AeroCRS is proud to announce the launching of a new robust Analytics system which will run on Qlik Sense platform and will give every airline the ability to analyze their sales data, in order to get deep insights about customers behavior and to act accordingly on different channels.
Qlik Sense was released in 2014 and was positioned as being the next generation of data visualization and discovery.

Why we moved from QlikView to Qlik Sense?

1. Mobile friendly - means that all applications render to your screen size, regardless of the device
2. Provide a greater level of self-service but in a controlled form
3. Create great looking visualizations with minimal effort
4.

Smart search functionality means that users can simply search multiple fields in the dataset and

see the results

5. Data connections are all centralised to the Management Console so that connections to

databases, folders, websites etc are controlled and reusable

Every airline in the world can benefit from AeroCRS Analytics system. Even if you are not using AeroCRS PSS system, our development team will establish the connection to your databases, so you will be able to enjoy the powerful tool of AeroCRS Analytics.

For more information and demonstration of the system contact sales@aerocrs.com
