

UNIQUE SOUTH FLORIDA PARTNERSHIP - SPIRIT AIRLINES AND WAYMAN AVIATION TO TRAIN FUTURE PILOTS

News / Airlines, Maintenance / Trainings

Wayman Aviation Academy announced a unique partnership with Spirit Airlines through their Spirit Wings Pilot Pathway program. The program will provide graduates with easily accessible, local mentorship with Spirit Airlines pilots and a fast track to a career in aviation as a First Officer with the airline. What also makes this partnership unique is that Wayman Aviation is the only flight college in the country, and in Spirit's program, that trains future pilots using Competency Based Training & Assessment, a superior standard of flight training recommended by the ICAO.

Eduardo Luy, Vice President of Wayman Aviation, commented: "Our partnership with Spirit through its Spirit Wings Pilot Pathway program highlights the level of trust airlines are placing in Wayman Aviation's rigorous training standards."

Tony Shen, President of Wayman Aviation, said: "As innovators at one of the best aviation colleges in the state, we have adopted a process called competency-based training which allows our students to be much more advanced in the principles of aviation safety at the early stages of

their career compared to students from traditional flight schools."

Wayman Aviation will not only be helping Spirit Airlines tackle the pilot shortage by sending pilots into their ranks sooner, thanks to this program and [Wayman's R-ATP certification](#). They will also provide better-formed pilots armed with CBTA training and an associate's degree in aviation sciences.

Wayman Aviation is excited for this partnership with its hometown airline Spirit as it aligns with Wayman's mission of providing the industry with the best-trained and most well-prepared pilots possible. Their headquarters are located only 15 minutes apart in Broward County, Florida.
