

EVE AND FLYBIS TO DEVELOP EVTOL OPERATIONS IN BRAZIL AND LATIN AMERICA

News / Business aviation

Eve Air Mobility signed a LOI with FlyBIS Aviation to collaborate on the development of eVTOL operations in Brazil and South America. Based on the agreement, FlyBIS will also purchase up to 40 of Eve's eVTOL vehicles. Andre Stein, Co-CEO of Eve, commented: "This new collaboration with FlyBIS will enable us to expand the future of air mobility to Southern areas of Brazil and other South American countries. This region has several high-traffic tourist areas that will benefit from eVTOL operations, reinforcing our commitment to fostering the urban air mobility market in different regions around the world."

FlyBIS has become a promising option for air mobility in South Brazil in the short term and is set to help change and improve the way future generations will move. After starting operations in Brazil's southern states, FlyBIS plans to expand operations to neighboring countries and contribute to the implementation and development of Eve's air mobility ecosystem. FlyBIS is backed by Brave Aviation whose current fleet includes Embraer Phenom 100 as well as other aircraft.

"We have a strong team in FlyBIS working together with Eve's outstanding workforce and second-to-none resources to develop and implement this project in the most financially efficient and sustainable way," said FlyBIS Co-Founder and CEO Gustavo Zanettini, who is also an aviation

consultant and airline pilot. “Our team is very motivated and confident, and we will be working to change future generations' urban air mobility for a more accessible and cleaner experience.”

FlyBIS' vehicles are included in Eve's industry-leading order backlog of up to 2,770 eVTOLs.
