

EXECUJET BELGIUM COMPLETES ITS FIRST HEAVY CHECK ON FALCON 7X

News / Business aviation, Maintenance / Trainings

ExecuJet MRO Services Belgium, a wholly-owned subsidiary of Dassault Aviation, has completed a 'C-check' on a Falcon 7X, its first heavy maintenance check on this aircraft type. The work was carried out at the MRO company's heavy maintenance centre at Belgium's *Kortrijk-Wevelgem International Airport*, coincidentally the same airport where the customer bases the aircraft.

Matthijs Hutsebaut, Regional Vice President for Europe at ExecuJet MRO Services commented: "We also did the pre-delivery inspection on this aircraft. The customer is one of the MRO company's long-standing clients."

ExecuJet MRO Services is a Dassault factory-owned MRO organisation that is certified to do heavy maintenance on Falcon 7X, Falcon 8X as well as different variants of the Falcon 2000 and Falcon 900.
