

JETEX DEBUTS ROLLS ROYCE PHANTOM FBO SHUTTLE SERVICE

News / Business aviation

Jetex officially announces the newest fleet of airport shuttle vehicles for its DWC (Dubai World Central) based Fixed Base Operator (FBO). The previous Rolls Royce Ghost fleet will be upgraded to Three Black Rolls Royce Phantoms, making Jetex the first company to provide an exclusively Rolls Royce Phantom airport shuttle service in the world. The Rolls Royce Phantom fleet was chosen to signify the level of luxury with which Jetex aims to serve their VIP client base. VIP passengers will ride in the epitome of comfort and luxury between the DWC based executive FBO terminal and their aircraft of choice, awaiting on the runway.

Jetex believes that maintaining the highest level of luxury and style is an integral part of the Luxury Travel Management Services that Jetex provides. "An FBO not only requires a luxurious lounge, meeting rooms, and reception, but also a way for our VIP clientele to reach their jets quickly, luxuriously, and comfortably. And I believe that the Rolls Royce Phantom is the best contender for all three" said Jetex CEO and President Adel Mardini. This is a modest first step for a new Jetex experience at its Dubai-based FBO, which encompasses a full scale rebuild of the facilities in order to offer a Royal-Ready experience. The new facilities will be, without doubt the most luxurious FBO in the world, aiming to serve Heads of State and Royalty as well as VIP passengers arriving at and departing from Dubai starting in May of 2016.
