

LAS VEGAS AIRPORTS TO OFFER SUSTAINABLE AVIATION FUEL FOR FLIGHTS FROM NBAA 2023 CONVENTION

News / Business aviation

Aircraft flying into Las Vegas' three airports for NBAA-BACE 2023 will have an opportunity to fuel up with sustainable aviation fuel, an innovation central to the industry's goal of achieving [net-zero carbon emissions](#) in the years to come. SAF – to be available at HND, North Las Vegas Airport (VGT) and Harry Reid International Airport (LAS) – can reduce aviation carbon emissions by up to 80%.

World Fuel Services will provide 40,000 gallons of the fuel at HND – more than double the total of SAF available at the airport for NBAA's 2021 convention – and will also offer the fuel at VGT for the first time in conjunction with the convention. Signature Aviation and Atlantic Aviation will have the supply on hand at LAS.

NBAA President and CEO Ed Bolen, commented: "Providing SAF for aircraft departing from this year's convention not only makes the event more sustainable, but allows NBAA members to take an active role in helping the industry to achieve our net-zero target"

NBAA-BACE offers an unparalleled opportunity to hear from thousands industry pioneers, and explore technologies that are driving the excitement, safety and sustainability of aviation. This year's convention will highlight the industry's focus on sustainability with an emphasis on the notable innovations and advancements being made to shape the future.
