

TAG AVIATION TO COMPLETE FIRST SCHEDULED C-CHECK ON A DASSAULT FALCON 7X AIRCRAFT

News / Business aviation, Events / Festivals, Maintenance / Trainings

TAG Aviation will undertake its first C-check on a Dassault Falcon 7X aircraft this Spring. The C-check will be completed in conjunction with a major cabin and cockpit refurbishment and will also include a new wood-varnishing repaint process which will be applied to the cabin's woodwork interior.

As the largest maintenance event for the Dassault Falcon 7X , all the expertise needed for C-checks requires special production coordination within maintenance, engineering, Customer support, spare parts and cabin refurbishment and special planning is in place within TAG Geneva's Maintenance department.

"We are delighted to have been entrusted with this prestigious project", said Philippe Rabier, Maintenance Sales Director, TAG Aviation Europe. "Customers value our comprehensive maintenance service capabilities and are increasingly taking the opportunity to combine scheduled maintenance with other service offerings. TAG has invested heavily to prepare all the expertise required for C-checks and we are currently planning further C-checks for the 7X and future Falcon models this year."

TAG Aviation has heavy maintenance centres in Geneva and Farnborough and also offers comprehensive maintenance services in Sion, Paris, Clermont-Ferrand, Madrid, Lisbon (network),

Hong Kong and Lomé in Togo. TAG Aviation Maintenance Services is approved by all main aircraft manufacturers and has certification to work on over fifty types of aircraft.
