

VERIJET TO BE FUELED BY DIMENSIONAL ENERGY WITH SAF MADE FROM CO2 CAPTURED FROM CARBON EMISSIONS IN THE AIR

News / Business aviation

At a ceremony held in New York City during UN 77th General Assembly and Climate Week's 14th year, Verijet CEO Richard announced the execution of a Letter of Intent with Dimensional Energy Inc. to purchase a minimum of 750,000 gallons of sustainable aviation fuel by 2025.

Allison Kane, Chief Experience Officer Verijet, commented: "We are excited to leverage Dimensional's groundbreaking carbon dioxide (CO₂) to fuels technology in the creation of truly Sustainable Aviation Fuel made from captured atmospheric carbon dioxide (CO₂) and water cracked with clean energy sources. Dimensional's technology is transformational. We are thrilled to participate alongside Dimensional in decarbonizing aviation."

Jason Salfi, CEO of Dimensional Energy, said: "Aviation as a form of transportation is forecast to grow by 50% over the next 20 years. I am excited to be working with Verijet to decarbonize aviation by offering the service of zero emissions air travel by pairing Dimensional's sustainable aviation fuel (SAF) with Verijet's high-performance jets."
