

ADEPT SWIPE FROM ACUMEN AVIATION

News / Maintenance / Trainings, Manufacturer

Acumen Aviation has launched a new mobile application – SWiPE for the users of ADEPT – the smart and secured records management platform from Acumen Aviation.

Through this intuitive app, users will be able to manage the records of all their assets in ADEPT on the go using their mobile devices. Some of the key features of the app are:

- Secure access to ADEPT servers

- Navigate dataroom to access records and view on the mobile device

- Capture and upload images from the phone camera

- Download documents and share with clients as an attachment or send the link on email

- Upload documents or pictures from device memory

SWiPE which stands for Software in Phone Environment has been developed after consultations

with existing and potential customers of ADEPT to make this app attuned to their requirements. With the introduction of this app, Acumen Aviation is confident that the users will find accessing the ADEPT data room quicker and easier. Acumen Aviation is intent on offering its clients intuitive solutions for efficiently managing their assets and this app has been designed with that very intent in mind.
