

CLAY LACY FAA REPAIR STATION IN CONNECTICUT GOT TCCA MAINTENANCE CERTIFICATION

News / Business aviation, Maintenance / Trainings

Clay Lacy Aviation FAA Part 145 Repair Station at Waterbury-Oxford Airport is now certified by Transport Canada to provide aircraft maintenance services for Canadian-registered business jets. Transport Canada Civil Aviation certification is based on compliance with the highest standards for aircraft maintenance quality, safety, performance and expertise.

Private Jet Maintenance in Connecticut at Waterbury-Oxford Airport

Meeting the needs of aircraft owners and flight departments throughout the Northeastern U.S. and now Canada, Clay Lacy's Waterbury-Oxford repair station provides complete aircraft maintenance, repair and overhaul services. The 65,000-square-foot facility is staffed by technicians trained on Gulfstream, Bombardier, Dassault, Cessna, Embraer, Hawker and Eclipse airframes.

Their work is backed by Clay Lacy's fifty-three years of experience maintaining and operating a wide variety of makes and models of business jets from every major manufacturer. Clients can rely on a highly skilled and trusted local resource for light line maintenance, heavy airframe inspections, jet engine and APU maintenance, avionics and

cabin entertainment upgrades and repairs.
