

EAA RAY AVIATION SCHOLARSHIP PROGRAM REACHES 500 PILOTS

News / Maintenance / Trainings

The EAA Ray Aviation Scholarship program continues to make a difference for young people pursuing aviation dreams, as 500 scholarship recipients have completed flight training and earned their pilot certificates. The scholarship program is funded by the [Ray Foundation](#), managed by EAA, and administered through the EAA chapter network. Through the program, EAA is able to provide deserving youth up to \$11,000 to help cover flight training expenses. EAA received \$1.8 million from the Ray Foundation for 2024.

Rick Larsen, EAA's vice president of communities and member programming commented: "Many aspiring pilots fall short of their goal due to the cost of flight training, so EAA working with the Ray Foundation helps relieve some of the financial pressure and make the goal of becoming a pilot even more accessible for future generations. The high completion rate of our scholars demonstrates the impact of a supportive environment provided by EAA chapters."

Since the program's introduction in 2019, more than 880 scholarships have been provided to young people with a passion for aviation. The current pilot certificate completion rate for Ray scholars is 81 percent, with approximately 270 more scholars currently in flight training. There are

EAA chapter and scholar eligibility requirements for the Ray Aviation Scholarship that indicate a commitment to success. Once a chapter is approved for the program, it nominates the chosen scholar for EAA's final review. Many chapters are granted the full \$11,000 for their selected scholar, but some chapters have committed 25 percent of the award, to secure their slot in the program. All EAA and divisional chapters in the United States and Canada are eligible for a grant up to \$11,000.

The [Lightspeed Aviation Foundation](#) and EAA award a Zulu 3 headset to each scholar after they complete solo flight or, if they soloed pre-scholarship, after passing the written exam. This recognizes the scholar as they progress and ultimately complete flight training.
