

EMBRAER ADDS FLY ACROSS MRO TO ITS AUTHORIZED SERVICE NETWORK IN MEXICO

News / Business aviation, Maintenance / Trainings

Embraer is adding Fly Across MRO to its Authorized Service Center Network for Executive Jets. The Mexican company will provide base maintenance for the Phenom and Praetor series at the Toluca International Airport. The agreement also includes Legacy 450 and Legacy 500 jets. Fly Across MRO will offer both scheduled and unscheduled maintenance, including AOGs and drop-ins.

The authorization was granted following a rigorous evaluation process, ensuring full compliance with Embraer's highest standards. This recognition positions Fly Across MRO as a key service provider for Embraer aircraft operators, offering maintenance, inspection, and repair services with support from one of the most respected manufacturers in the aerospace industry.

Javier Gonzalez, CEO of Fly Across commented: “This recognition marks a significant milestone for our company. Embraer’s authorization validates our continuous efforts to deliver top tier services and strengthens our position as a leader in aircraft maintenance in the region. We are fully committed to ensuring that Embraer aircraft operators receive efficient, reliable service that meets the highest international standards.”

Frank Stevens, Vice President of Global MRO Centers for Embraer Services & Support stated: “It is a pleasure to welcome Fly Across MRO to Embraer’s Authorized Service Center Network. We are pleased to grow our footprint in an important market like Mexico and in a strategic location for our operators. Embraer is growing its presence in the country, and we continue to enhance our services and support capabilities and capacity in Mexico.”

With this new certification, Fly Across MRO expands its capabilities to service a wide range of Embraer aircraft models, ensuring maximum safety and operational efficiency for its clients.

Embraer’s network dedicated to Executive Jets includes eight Embraer Owned Services Centers, 44 Embraer Authorized Service Centers in the Americas and 74 worldwide. Embraer Services & Support has also recently doubled its MRO-dedicated capacity for business jets in the U.S., with new maintenance lines in Dallas Love Field, TX, Cleveland, OH, and Sanford, FL.
