

FIRST ALSIM SIMULATOR IN SLOVENIA

News / Maintenance / Trainings

Alsim announced the sale of an AL 250 SEP MEP for the first time in Slovenia. Aviation Career Center, a Zero to ATPL training specialist, located in Ljubljana, Slovenia-EU, has chosen Alsim to purchase their new simulator.?

The Alsim AL250 is a generic and compact simulator for single & multi engine piston (SEP/MEP reconfigurable) PPL, CPL & IR training. The device meets all current regulatory standards and responds to training requirements of smaller and mid-sized ATOs, flight schools, and universities. With more than 30 devices installed worldwide, the AL250 has a proven track record for cost-effectiveness and helps save numerous aircraft hours.

Aviation Career Center specializes in Zero to ATPL training for international students without previous experiences, as well as Airbus A320 Type Rating training for non-type rated pilots. The training in Aviation Career Center is performed on an International Airport with modern Glass Cockpit airplanes and ALSIM's simulator is a perfect match to enhance the quality level of the training, which is mainly conducted by airline experienced instructors.
