

FLORIDA FLYERS FLIGHT ACADEMY ELEVATES PILOT TRAINING WITH THE NEW TECNAM P-MENTOR FLEET

News / Maintenance / Trainings, Manufacturer

Florida Flyers Flight Academy, which received the first two of ten ordered Tecnam P-Mentor aircraft. This delivery marks the beginning of a significant fleet modernization program designed to provide students with a seamless, state-of-the-art training environment. The introduction of the P-Mentor fleet allows Florida Flyers to offer a unique single-platform training concept. Students can now progress from zero flight experience through Commercial Pilot certification on the exact same aircraft type. This consistency eliminates the need to constantly adapt to different cockpit systems, resulting in a smoother learning curve, reduced training costs, and better value for every flight hour.

Rainer Hueckels-Loeffeck, CEO of Florida Flyers Flight Academy commented: "Florida Flyers

Flight Academy proudly celebrates a major milestone with the arrival of its new Tecnam P-Mentor aircraft, the first two of ten units ordered as part of our ongoing fleet expansion and modernization plan. This marks our continued commitment to providing students with advanced, safe, and efficient training equipment that meets the highest global standards. Adding the Tecnam P-Mentor series reflects our investment in the future of aviation training and reinforces our position as one of the most advanced flight academies in the United States. We don't just train pilots; we develop aviation professionals, offering guidance, structure, and real-world knowledge to help each student reach their goals with precision and support."

Walter Da Costa, Tecnam's Chief Sales Officer, stated: "We are delighted to have Florida Flyers Flight Academy choose Tecnam for their fleet expansion. The P-Mentor is a game-changer for flight academies, offering a unique blend of modern technology and superior handling qualities. We are proud to support Florida Flyers in training the next generation of pilots on aircraft that are not only fun to fly but also environmentally friendly and cost-effective."

The P-Mentor is designed to mirror modern airline cockpits, smoothing the transition to multi-crew environments and advanced flight operations. By standardizing on this advanced platform, Florida Flyers ensures fewer scheduling delays and consistent fleet availability, allowing students to focus entirely on honing their skills. This fleet update underscores Florida Flyers' forward-thinking approach, creating a safe, efficient, and environmentally responsible training environment that prepares students for the evolving aviation industry.
