

GA TELESIS DELIVERED FIRST OF TWO 737-800SF FREIGHTER CONVERSIONS TO BLUEBIRD NORDIC

News / Maintenance / Trainings

GA Telesis announced the delivery of the first of two scheduled 737-800SF aircraft to Bluebird Nordic. The aircraft, owned by Tokyo Century Corporation was delivered from Aeronautical Engineering authorized Conversion Center, Commercial Jet, in Dothan, Alabama. GAT managed the conversion and remarketing of the aircraft and will remain involved as lease manager moving forward.

Senior Vice President of the Asset Transaction Group, David Ellis, commented: “GA Telesis is delighted to have managed this transaction on behalf of our shareholder successfully. This deal reiterates the GA Telesis value-add proposition with respect to managed aircraft, and we are very grateful for the cooperation of both Tokyo Century and BBN.”

CEO of Bluebird Nordic, Ms. Audrone Keinyte said: “We are grateful to Tokyo Century Corporation and GA Telesis for a very professional execution of the transaction - as Bluebird Nordic continues to grow its Boeing 737-800 freighters fleet. I am sure our partnership with Tokyo Century Corporation and GA Telesis will continue to strengthen over upcoming years as Bluebird Nordic

continues to expand. ”

GA Telesis' Leasing, Investment, Financing & Trading Group entered the air cargo sector in 2021 and has continued at pace with five aircraft converted and delivered since. This cooperation with TCC has allowed TCC to extend the economic life of one of their owned 737 aircraft, which begins a second life as a freighter aircraft with a top-tier European cargo operator.
