

GE AEROSPACE NAMES FL TECHNICS INDONESIA AS FIRST MRO PARTNER FOR AVIONICS SUPPORT

News / Maintenance / Trainings

FL Technics Indonesia, the first MRO in Indonesia to be appointed as a GE Aerospace avionics support partner, has signed a service support agreement with GE Aerospace covering Boeing 737 and Airbus A320 aircraft. The partnership extends avionics support capabilities across the company's maintenance facilities in Jakarta and Bali.

The agreement was officially signed during MRO Asia-Pacific in Singapore, marking a significant step in strengthening Indonesia's aircraft maintenance ecosystem. Under the partnership, GE Aerospace's technical expertise and support services will be available directly within FL Technics Indonesia's hangars at Soekarno-Hatta International Airport and I Gusti Ngurah Rai International Airport, providing airline operators with streamlined access to specialized avionics maintenance and support.

Martynas Grigas as Chairman of FL Technics Indonesia commented: "Avionics is the backbone of

aircraft systems, an area we're always working to keep at the highest standard, with the best resources and expertise behind it. This partnership with GE Aerospace lets us bring an added layer of expertise directly into our operations. It's part of how we keep improving our service with high safety standards and reliable maintenance solutions as our airline customers' operational needs evolve."

Matt Burns, General Manager of Avionics for GE Aerospace stated: "We are proud to work with FL Technics Indonesia as it expands its capabilities in a dynamic and growing aviation market. This agreement reflects GE Aerospace's commitment to supporting customers in Indonesia and across the region with avionics expertise that support safe, reliable, and efficient operations."
