

HELI-ONE NORWAY ADDS AIRBUS AS350 BLADE REPAIR CAPABILITY

News / Business aviation, Maintenance / Trainings

Heli-One Norway, a leading provider of helicopter maintenance, repair, and overhaul (MRO) services, has added Airbus AS350 blades to their repair and overhaul capabilities. This repair capability gives AS350 operators in the UK and Norway another blade repair option in a fully licensed and OEM-approved facility with short delivery times.

Heli-One Norway recently opened a new state-of-the-art blade shop that features the latest MRO technology with a heavy focus on Lean efficiency and safety. The shop has capability for other Airbus platforms including the AS332 and H225, and can also work on Sikorsky S-92 blades.

The team's expertise and familiarity with Airbus aircraft makes the addition of the AS350 platform a natural one, as the repair process will leverage existing tooling and resources already in place.

“We are excited to introduce this new capability at the shop and to AS350 operators in the UK and Norway,” said Eddie Lane, President, Heli-One. “Our technicians have decades of experience repairing Airbus blades. Adding this new platform is a great accomplishment for our team. Our blade technicians are among the best in the industry and delivery quality repairs efficiently, ensuring operators can return to service quickly.”

Heli-One Norway is an EASA Part 145-approved facility with Level D (Depot) capability on BOV repairs and Level I+ (Intermediate) capability on COV repairs. The AS350 blade part numbers supported by Heli-One Norway are:

- 355A11-0020-xx
- 355A11-0030-xx

Heli-One is based in Richmond, British Columbia, Canada, and has MRO operations in Richmond, Canada; Delta, Canada; Stavanger, Norway; Fort Collins, Colorado; and Rzeszow, Poland. Heli-One is the world’s largest independent helicopter MRO and holds certifications and expertise on a broad range of airframes and components from major helicopter and engine manufacturers, including Airbus, Sikorsky, Leonardo, Bell, Safran, Pratt & Whitney and General Electric.

Heli-One is a segment of CHC Helicopter, the operating company of CHC Group LLC.
