

SEVENAIR ACADEMY PARTNERS WITH AEROPLANNED

News / Maintenance / Trainings

Sevenair Academy announce latest partnership with Aeroplanned, an innovative cloud-based platform created for the Flight Training Industry based out of New Zealand. As one of the leading flight training schools in Europe, Sevenair is committed to meeting the growing demand for skilled pilots, and with all the complexities that come with running a large operation Sevenair has turned to Aeroplanned to provide the planning answers that are so difficult to generate manually.

Sevenair Academy COO Cpt Salvador Costa Pereira,commented: "Aeroplanned's outstanding software is a game-changer for our flight school. It gives us answers and solutions like never before. There's nothing else like it on the market, and I'm excited to see how it will improve our operations.Working with Jenand Jacquie is a pleasure. Their wealth of knowledge in flight training planning is evident, and it's fantastic to have allies as we continue to strive towards optimal efficiency and excellence."

For Jen (Founder and CEO) and Jacquie (Co-Founder), this partnership is a happy reunion with the Ponte de Sor base. They previously managed the planning for this base during its time under L3Harris ownership. Their familiarity with the operation has made this reconnection a particularly enjoyable experience. Aeroplanned are delighted and proud to be teaming up with Sevenair

Academy as we grow our global customer base. Being a part of their journey is a real honour, and we're super excited to make a positive impact in the aviation industry together.
