

SMART AVIATION CHOOSES ALSIM AGAIN

News / Maintenance / Trainings

Smart Aviation, biggest flight school in Western Poland based in Poznan Lawica International Airport, renewed its trust in Alsim in purchasing an AL250. Smart Aviation has already been operating an Alsim ALX, which was certified on April 2017 and has reached more than 5500 hours since then.

The Alsim AL250 is a generic and compact simulator for single & multi engine piston (SEP/MEP reconfigurable) PPL, CPL & IR training. The device meets all current regulatory standards and responds to training requirements of smaller and mid-sized ATOs, flight schools, and universities. With more than 30 devices installed worldwide, the AL250 has a proven track record for cost-effectiveness and helps save numerous aircraft hours.

Mateusz Dzialynski, CEO and HT of ATO Smart Aviation explains: "Our decision to purchase new simulator was determined by huge demand for aviation training but also the opening of a new base in Zielona Gora International Airport. Smart Aviation students are very successful in applying a job

at airlines thanks to very high standard of aviation training provided by experienced flight instructors.” Mateusz Dzialynski who also works as airline pilot on Boeing 737, perfectly understands global needs for hiring pilots and helps students to meet the highest requirements of aviation market. “The purchase of Alsim simulators was a giant leap for Smart Aviation to become one the biggest flight schools in Europe offering students complete training program from Zero to ATPL including MCC and JOC training.”

Anna Lezoray, Sales Account Manager for Alsim mentioned: “We are very proud to count Smart Aviation between our recurring customers. It is extremely rewarding to know that purchase of an Alsim ALX was one of the factors allowing Smart Aviation achieving their strong position on current, very competitive pilot training market. Smart Aviation case also shows that investing in a reliable, market proven and evolving flight simulator assures your return on investment.”

Smart Aviation LLC is an Approved Training Organisation with certificate number PL/ATO-51 approved by Polish Civil Aviation Authority. This flying school is based at Poznan-Lawica International Airport. Smart Aviation is the only EASA Approved Training Organization in Poznan offering applicants without previous flight experience a complex flight training from Zero to ATPL(A) frozen.
