

STANDARDAERO SIGNS ENGINE MRO WITH ROLLS-ROYCE

News / Maintenance / Trainings

StandardAero signed an agreement with **Rolls-Royce** to become an authorized engine line **maintenance** service provider for CorporateCare® operators of the AE 3007A and BR710A2-20 turbofan engines. The new agreement expands the company's engine service portfolio and authorizes StandardAero to provide additional services to its customers.

The five-year agreement covers line service work on Rolls-Royce BR710A2-20 and AE 3007A engine models, including engine borescoping, removal and replacement, troubleshooting and CorporateCare®/Warranty maintenance. Initially, the BR710 service will be offered at StandardAero's LAX/Van Nuys facility while the AE 3007 service will be available at the company's LAX/Van Nuys, Houston and Augusta facilities.

With this new authorization, StandardAero is adding engine maintenance capability for operators of Embraer Legacy 600/650 and Bombardier Global 5000/6000 aircraft, which are powered by Rolls-Royce AE 3007A or BR710A2-20 turbofan engines.

"StandardAero offers the most comprehensive suite of services for the Business Aviation operator, covering all needs of our customers," said Marc McGowan, President of StandardAero Business Aviation. "This new partnership with Roll-Royce allows us to continue the expansion of our offerings and deepen our long-term relationship with one of the world's most successful aircraft engine OEMs."

Andy Robinson, Rolls-Royce Senior Vice President Services and Customer Support said: "We are very proud to welcome StandardAero to the Rolls-Royce Authorized Service Centre Network. We

have a long and successful relationship with StandardAero, and are confident they will deliver the high level of line maintenance support that our CorporateCare® customers deserve."
