

AIR MAURITIUS TAKES DELIVERY OF ITS FIRST A350 XWB

News / Manufacturer

The first A350 operator based in the Indian Ocean

Air Mauritius has taken delivery of its first Airbus A350-900 aircraft, opening a new chapter for the Indian Ocean carrier. The aircraft, leased from AerCap, was delivered during a ceremony held in Mauritius today.

The Mauritian airline based airline has chosen a very comfortable two class layout with a total of 326 seats comprising 28 in Business Class and 298 in Economy Class.

The A350-900 equipped with Air Mauritius' latest cabin products including new seats, an all-new inflight entertainment system and inflight connectivity will offer passengers unparalleled levels of comfort and convenience.

This A350-900 is the first of six to be delivered to Air Mauritius. Four will be purchased directly from Airbus and two leased from AerCap. The carrier will deploy the aircraft on its expanding route network connecting Mauritius with Asia, Africa and Europe.

Air Mauritius already operates a fleet of 10 Airbus aircraft including six A340-300s, two A330-200s and two A319s on its regional and long haul services.

The A350 XWB features the latest aerodynamic design, carbon fibre fuselage and wings, plus new fuel-efficient Rolls-Royce engines. Together, these latest-generation technologies translate into unrivalled levels of operational efficiency, with a 25 per cent reduction in fuel burn and CO2 emissions, in addition to significantly lower maintenance costs.

The spacious, quiet, tastefully-appointed interior and mood lighting in the A350 XWB Airspace cabin contribute to superior levels of comfort and well-being, setting new standards in terms of flight experience for all passengers.

To date, Airbus has booked a total of 858 firm orders for the A350 XWB from 45 customers worldwide, making it one of the most successful widebody aircraft ever.
