

ELECTRICAL POWER GENERATION FOR THE MA-700 REGIONAL AIRCRAFT PROVIDED BY SAFRAN

News / Manufacturer

Safran Electrical & Power has signed a contract with AVIC XAC Commercial Aircraft Co., Ltd (XCAC) on the main and auxiliary electrical generation system of the next MA700, a civil regional turboprop aircraft.

The company will provide a mature and reliable variable generation system, that ensures lower cost of maintenance and higher reliability by using an optimised shared oil system, and advanced electromechanical design, which results from Safran Electrical & Power's long history in aerospace power generation systems.

“Since we started our journey with XCAC on the MA60 program, our first collaboration, we have become one of their key partners on the generation systems. This contract is strengthening Safran’s position in China and confirms that the Group is today a major partner in the Chinese civil aviation market,” says Hervé Blanc, Vice President and General Manager of the Power division of Safran Electrical & Power.

Zhu Jianxin VP of AVIC XAC Commercial Aircraft Co. Ltd stated “The contract signing is a successful milestone of MA700 electrical generation system development. 2019 will be a critical and busy year for MA700 program regarding both products delivery and testing to ensure a first flight scheduled in 2020. Based on our long-term relationship with Safran, we are confident to support on-time the roll- out and jointly make the MA700 a success.”

Safran is an international high-technology group, operating in the aircraft propulsion and equipment, space and defense markets. Safran has a global presence, with more than 91,000. Safran is listed on the Euronext Paris stock exchange, and is part of the CAC 40 and Euro Stoxx 50 indices.

Safran Electrical & Power is a world leader in electrical systems for aircraft, ranked No. 1 for wiring and No. 2 for power generation, while playing a key role in the development of more electric aircraft. The company has more than 13,000 employees in 12 countries.
