

# EMBRAER EVE AND KENYA AIRWAYS PARTNER ON THE FUTURE OF URBAN AIR MOBILITY

News / Airlines, Manufacturer

Eve Urban Air Mobility Solutions signed a Memorandum of Understanding with Kenya Airways PLC, the flag carrier of Kenya, through its fully owned subsidiary Fahari Aviation. This collaboration aims to develop operational models for the wide-accessibility of Urban Air Mobility to support Fahari Aviation's key markets. In addition, this partnership will establish the co-creation of a foundation of concepts and procedures to safely scale electrical vertical takeoff and landing (eVTOL) aircraft, also known in the market as EVA .

Eve will support Fahari Aviation, the Unmanned aircraft systems (UAS) division of Kenya Airways that promotes safe and secure UAS usage in the region, in establishing its UAM network and collaborate on the required Urban Air Traffic Management (UATM) procedures and UAM operating environment. This partnership will also allow Fahari Aviation to support Eve's aircraft and product development process which will help guide the integration of UAM with Kenya Airways' overall operations. Eve's fully electric aircraft is designed to be accessible to all while being a community-friendly aircraft with a low noise signature and no emissions. It aims to drastically cut road travel time. It is ideally suited as a UAM aircraft bringing all traditional aviation travelers closer to their final destination efficiently and comfortably.

"We are thrilled to partner with Kenya Airways to provide new forms of air mobility throughout the region for both people and goods. The creation of disruptive and widely accessible Urban Air

Mobility solutions will help democratize mobility by making it more accessible, affordable and giving communities more options. This partnership will foster long-term mobility strategies throughout the country and region. With our aircraft and aerospace services backing and Kenya Airways' innovative approach to air mobility, we are enthusiastic about opening this region to more sustainable and community-friendly air access for all," said Andre Stein, President & CEO of Eve.

"Partnerships are vital in mapping out the future of our airline, something which the global crisis has reinforced. Innovation is a critical element of our long-term sustainability. Fahari Aviation is at the forefront of exploring advanced technologies, with a key focus in aviation, starting with drone technology. With this partnership, we look to develop innovative air mobility solutions for our clients in Kenya and throughout the region," stated Allan Kilavuka, Group Managing Director and CEO of Kenya Airways.

The partnership will deliver a robust strategy to provide Fahari Aviation's passengers with a sustainable, accessible, and affordable transportation option. It is estimated that using UAM from the airport to downtown, EVA can reduce conventional road trips by up to 90% turning an hour and a half ride into a 6-minute flight.
