

EMIRATES POST GROUP AND DRONAMICS TO EXPLORE IMPLEMENTING CARGO DRONE DELIVERIES

News / Manufacturer

Emirates Post Group and Dronamics, signed a LOI to explore transformative solutions in logistics through advanced cargo drone capabilities in the UAE. The LOI marks the beginning of a dynamic collaboration set to redefine cargo drone delivery in the United Arab Emirates. Under the terms of this LOI, EPG will explore and trial Dronamics' cargo drone service to enable same-day middle-mile and long-range deliveries. Both organizations will collaborate towards developing a comprehensive cargo drone delivery network in the UAE and GCC. Once successfully piloted, EPG intends to integrate this innovative technology into its logistics network and enable access of the technology to the wider logistics industry. In addition, EPG intends to be a launch partner of the future Dronamics UAE joint venture to support the expansion of their cargo drone operations in the region.

Abdulla Mohammed Alashram, Group CEO of Emirates Post Group, commented: "With a shared vision of reshaping the future of the logistics sector, EPG and Dronamics are dedicated to

enhancing cargo delivery speed, sustainability, and efficiency by deploying state-of-the-art drone technology. This partnership represents a significant milestone in the advancement of autonomous cargo drone transportation."

Dronamics, renowned for its pioneering work in the cargo drone industry, has successfully conducted tests of its cutting-edge drones, validating their potential to serve various industries. The company's vertical integration, encompassing drone aircraft design, construction, operation, and the creation of Droneports, positions it as a formidable force capable of revolutionizing the same-day logistics sector.

Svilen Rangelov, CEO and Co-Founder of Dronamics, said: "Partnering with Emirates Post Group provides us with the exciting opportunity to work on our expansion to the Middle East and the United Arab Emirates in particular. Through this agreement we will look to implement our unique middle-mile cargo drone technology on the UAE market in service of EPG, its customers and its universal service mandate - an important step to achieving our vision of enabling same-day delivery for everyone everywhere."

As part of this LoI, Emirates Post Group will enable Dronamics, through its postal and express business managed by Emirates Post, to conduct Proof-of-Concept (POC) flights in the UAE with at least one drone aircraft by 2024. The strategic partnership with Dronamics, with its advanced technologies, will support EPG's efforts in enabling the overall delivery supply chain of logistics operations in the UAE.
