

HALO-FLIGHT EXPANDS LIFE-SAVING CAPABILITIES WITH NEW BELL 407GXI

News / Business aviation, Manufacturer

Bell Textron hosted a special delivery ceremony during the Air Medical Transport Conference to celebrate HALO-Flight's delivery of a new IFR-equipped Bell 407GX. As the fifth and final Bell 407GX to deliver in HALO-Flight's fleet renewal, the ceremony marked another milestone in the long-standing relationship between Bell and HALO-Flight; a premier nonprofit air medical service provider committed to delivering critical care and rapid emergency response across South Texas.

Lane Evans, managing director for North America sales, Bell commented: "For more than three decades, HALO-Flight has been a vital lifeline for patients in need of urgent medical care. We are proud to continue supporting their mission with aircraft that embody reliability, safety, and performance. The Bell 407GX delivers the power and precision that emergency operators depend on every day."

Travis Patterson, chief executive officer, HALO-Flight stated: “This new Bell 407GX_i represents more than an aircraft, it’s an investment in the safety and health of our community. Our work with Bell ensures we can continue providing the highest standard of emergency medical response for the people who depend on us most regardless of their ability to pay.”

Founded in 1987, HALO-Flight serves a 28,000-square-mile region throughout South Texas, providing life-saving air medical transport for residents in underserved and rural communities. With a fleet of Bell aircraft, HALO-Flight’s highly trained medical and flight crews respond to emergencies ranging from accident scenes to hospital transfers, ensuring patients receive the fastest route to advanced care.

The Bell 407GX_i offers enhanced mission capability through advanced avionics, exceptional maneuverability, and proven reliability in the most demanding conditions. Its spacious cabin and high-performance engine allow HALO-Flight to respond swiftly and safely to emergencies while carrying critical care specialists and lifesaving equipment.

To further enhance fleet readiness, HALO-Flight’s fleet of aircraft is enrolled in Bell’s Customer Advantage Plan program. HALO-Flight is Bell’s first customer to integrate CAP with HUMS across their fleet. This is an innovative approach to proactive maintenance and mission reliability. Combining both solutions helps operators like HALO-Flight ensure their aircraft are always ready for life-saving missions while optimizing long-term operational efficiency.
