

HYNAERO & ALTITUDE AEROSPACE TO COOPERATE ON THE DEVELOPMENT OF FREGATE-F100 AMPHIBIOUS WATER BOMBER AIRCRAFT

News / Manufacturer

HYNAERO, a start-up from Bordeaux (France), working on the design and manufacturing of a new generation amphibious water bomber aircraft, the Fregate-F100, announce the signing of a MoU with Altitude Aerospace, an international group specializing in aeronautical engineering activities, from design to production. The protocol, signed on February 10th, 2024, formalizes the commitment of both companies to collaborate on the Fregate-F100 program and particularly on the conceptual design phases of the aircraft.

David Pincet, HYNAERO co-founder and President, commented: "We are delighted to formalize this partnership with Altitude Aerospace, with whom we have been collaborating for several months already. This agreement represents, in addition to the know-how and experience of Altitude Aerospace, significant financial support and a major step forward for the next phases of our aircraft program."

Nancy Venneman, President of the Altitude Aerospace Group, said: "We are delighted to collaborate on this ambitious and innovate new program, which is completely in line with the strategic positioning of the group and, moreover, with our geographical development in France".
